

Diving expertise for Saudi Aramco's Arabiyah and Hasbah offshore fields

Provision and supply of a mobile saturation diving spread with experienced saturation and air diving team covering 24-hour operations. The system was installed on-board Seven Champion as the contractor-nominated vessel.

Customer	Saudi Arabian Oil Company – Saudi Aramco
Contractor	Subsea 7
Location	Arabiyah and Hasbah offshore fields, Saudi Arabia
Start date	1 July 2019
End date	12 September 2019

The solution

During the operation, the JF Subtech saturation and air diving team successfully provided the following services:

- Installation of ten production / closure spools and six tie-in spools from 250 class material barge, including performing subsea metrologies
- Assistance in pipeline flooding, cleaning, gauging, and other pre-commissioning activities
- Installation of spool support (subsea grout bags)
- Assistance in ICCP sleds and cable installation
- Concrete sleeper / mattress installation
- Dive support for Seven Champion activities as required
