# Air Winches & Hoists

The most comprehensive range of Air Winches, Air Chain Hoists and BOP Handling Systems on the market – 0.125 t to 200t capacity. Setting the standards in winch and hoist technology, our lifting equipment are known throughout the Heavy Industry, the Mining and Tunneling Industry, the Public Works and the Offshore Drilling Industry for their reliability and safety.

# Air Winches

The Ingersoll Rand line of air winches combines the best ideas and innovations resulting from over 200 years of experience in solving the most challenging lifting, pulling and positioning applications in the world's toughest industries.

Our air winches are manufactured in either Douai, France (gear type motor winches) or Kent, Washington, USA (piston type motor winches).

Enjoy the wide selection offered by these two lines and choose the model that best fits your application.

## Liftstar® & Pullstar® Series Air Winches 0.15 - 10 t Load Capacity

Designed to work in difficult environments, these winches feature a low maintenance, highly reliable gear motor with high torque output that translates into smooth starts and stops. Their rugged and compact design makes them ready to take on your most challenging applications.

- **LIFTSTAR® (LS)** models are designed for lifting applications with a 5:1 design factor at rated capacity.
- **PULLSTAR® (PS)** models are designed for pulling applications with a 3.5:1 design factor. They come standard with a drum disengaging clutch for free spooling unloaded wire rope.

### Reliable gear motor

- Its unique design with only two moving parts makes it ideal for severe applications in hot, cold, dusty, dirty, explosive and wet conditions.
- Less sensitive than other motors to long storage period or long period with no use.
- Virtually maintenance free and reduced downtimes.

### Rugged construction

- Originally designed for the mining industry, the LS and PS winches are very robust and durable.
- Cast iron and steel construction.

### Meets worldwide standards

- European standards FEM 9.511 and FEM 1001 for lifting.
- U.S. standard ASME/ANSI B30.7.
- Duty rating FEM 1Bm / ISO M3.

### Features

- Light weight and compact design. Easy to carry.
- Robust steel construction.
- Automatic self-adjusting disc brake.
- Reliable gear type air motor in composite material.
- High efficiency planetary gear box.
- Flameproof by nature.
- Low noise level, quiet operation.
- Variable speed and precise positioning through direct control lever with "lift & shift" system with automatic return to neutral position or through progressive remote pendant.
- Declutchable drum on Pullstar® haulage versions for free spooling.
- Individually load tested before shipment – Delivered with manufacturer's test certificate.

CE marked models are compliant with the latest European machinery directive No 2006/42/EC and the European standard for power driven winches EN 14492-1. These models include as standard the following safety features: Drum guard — Emergency stop with main air shut-off valve as per EN 418. — Overload protection (LS models only) — Upper / lower limit switches (LS models only) — CE declaration of conformity.

Liftstar® and Pullstar® winches are, by design, particularly suitable for use in potentially explosive atmospheres, unlike electric winches. They are classified as standard as equipment category 2 for applications in zone 1 and 2 (as per ATEX 94/9/CE directive for surface industry). ATEX marking: **Ex II 2 GD c IIB 135°CX**. For the mining industry they can be fitted with an optional package to comply with requirements of equipment category M2 (consult us).

# Liftstar® & Pullstar® Series Air Winches

0.15 - 10t Load Capacity

## LIFTSTAR® Lifting Series

LIFTSTAR® winches are designed with a 5:1 minimum safety factor at rated capacity.

- LIFTSTAR® winch always lifts its rated capacity at any layers of rope.
- LIFTSTAR® winch is designed so that the line speed remains constant on all layers when lifting its nominal load.
- The drums are generously dimensioned to obtain a minimum drum to rope diameter of 18:1 to avoid excessive bending of the wire rope thus increasing its life time.
- The rope storage capacities correspond to the maximum length of rope which can theoretically be stored onto the drum (calculated with wire rope tightly wound at full drum).
- The rated "working" rope capacity leaves a free space of 1.5 times the nominal rope diameter from the top of the drum flanges (as per the European standard EN 14192-1). This helps preventing the wire rope from running off the drum flanges during operation.

\* On LIFTSTAR® winches the lifting speed with rated load is constant at all layers.

## PULLSTAR® Pulling Series

PULLSTAR® winches are designed with a 3.5:1 minimum safety factor at rated capacity.

- The rated capacity of the PULLSTAR® winches is calculated at the lowest rope layer on the drum. It corresponds to the maximum pulling force allowed. Refer to detailed curves on page 8 to get corresponding pulls / speeds at different layers.
- Pulling winches are intended for use on horizontal surfaces with no or insubstantial inclination.
- PULLSTAR® are fitted as standard with a free spooling clutch for rapid manual rope unwinding. The manual clutch is secured against unintended operation.

# Liftstar® & Pullstar® Series Air Winches

0.15 - 10t Load Capacity

## LIFTSTAR® Lifting Air Winches

Reliable and safe, this modern range of winches is designed for harsh environments. They can be equipped with many options for effective adaptation to your application (see pages 9 and 10 for details).

See dimensions on page 11.

Specifications at 6.3 bar dynamic pressure (when winch is running) — Working pressure range 5 to 7 bar.  
As per European standard EN 14492-1 – Group of mechanism as per FEM 1Bm / ISO M3.

Model number	Rated capacity at TOP LAYER (kg)	LIFTING SPEED AT RATED LOAD at top rope layer (m/min)	LIFTING SPEED AT RATED LOAD at lowest rope layer (m/min)	Rated number of layers (1)	Air consumption with rated load (m³/min)	Sound level as per EN 14492-1 dB(A)	Net weight (kg)
LS Portable Series – Lifting Ratings at 5:1 Design Factor

LS5000RGC	250	19	44	92	145	202	263	329	—	473

(2) As per EN 14492-1, the working rope capacity leaves a free space of at least 1.5 times the nominal rope diameter from the top of the drum flanges.

# Liftstar® & Pullstar® Series Air Winches

## 0.15 - 10t Load Capacity

### PULLSTAR® Pulling Air Winches

Intended for use on horizontal surfaces with no or insubstantial inclination, the PULLSTAR® winches are fitted as standard with a free spooling clutch for rapid manual rope unwinding.

See dimensions on page 11.

**Specifications** at 6.3 bar dynamic pressure – Working pressure range 5 to 7 bar.  
**As per European standard EN 14492-1** – Group of mechanism as per FEM 1Bm / ISO M3.

Model number	Pulling force: Lowest / top layer (kg)	Rated number of layers <sup>(1)</sup>	Air consumption with rated load (m <sup>3</sup> /min)	Sound level as per EN 14492-1 dB(A)	Net weight (kg)
<b>PS Portable Series – Pulling Ratings at 3.5:1 Design Factor</b>					
PS2-1000R	1 000 / 800	5	4	92	41
PS2-1000RGC	1 000 / 800	5	4	92	47
PS2400R	2 400 / 2 000	3	5	88	62
PS2400RGC	2 400 / 2 000	3	5	85	76
<b>PS Heavy Series – Pulling Ratings at 3.5:1 Design Factor</b>					
PS4000R	4 000 / 2 500	5	12	95	225
PS4000RGC	3 600 / 2 500 <sup>(2)</sup>	4	12	95	278
PS10000R	10 000 / 8 000	6	12	87	640
PS10000RGC	10 000 / 8 000	6	12	87	755

(1) Measured with recommended rope diameter (see table below).

(2) For PS4000RGC, line pulls are reduced by 10% and line speeds are increased by 10%.

#### Rope capacity with recommended rope diameter

For storage capacities with other rope diameters, use our "drum storage calculator" at the following web address:

<http://www.ingersollrandproducts.com/lifting/winches/drum.htm>

Model number	Minimum rope breaking force (kN)	Recommended rope diameter (mm)	Cumulated working rope capacities in meters <sup>(3)</sup> with RECOMMENDED ROPE DIAMETER						Max. rope storage capacity (m)
			Layer 1	Layer 2	Layer 3	Layer 4	Layer 5	Layer 6	
PS Portable Series – Pulling Ratings at 3.5:1 Design Factor									
PS2-1000R	35	6.5	9	20	32	45	58	—	89
PS2-1000RGC	35	6.5	19	42	66	93	121	—	183
PS2400R	84	10	8	19	30	—	—	—	57
PS2400RGC	84	10	18	40	65	—	—	—	120
PS Heavy Series – Pulling Ratings at 3.5:1 Design Factor									
PS4000R	140	13	17	36	57	79	103	—	156
PS4000RGC	140	13	31	65	102	142	—	—	230
PS10000R	350	19	21	44	69	96	125	156	224
PS10000RGC	350	19	44	92	145	202	263	329	473

(3) As per EN 14492-1, the working rope capacity leaves a free space of at least 1.5 times the nominal rope diameter from the top of the drum flanges.

### Main options for both Portable and Heavy Series

Drum guard on PS2400R

Limit switches on LS5000R

Limit switches on LS600R

LS5000R with emergency stop

LS2000R with overload protection

PHS control on PS2-1000R

#### Drum guard

Prevents the operator from inadvertent contact with winch moving parts – Delivered as standard on all CE compliant versions.

#### Top and bottom limit switches

Automatically stops the winch when the travel exceeds the pre-determined working distance. Enclosed mechanism is environmentally protected. Needs to be adjusted on site as per customer configuration/application – Delivered as standard on Liftstar® lifting Series in CE compliant version.

#### Emergency stop

Allows the operator to quickly and safely stop the winch in case of an emergency situation. Pressing the e-stop button closes a shut-off valve which stops the main air from entering into the motor, brake is applied automatically – Delivered as standard on all CE compliant versions.

#### Pneumatic overload protection

Automatically stops the winch in case of overload exceeding 125 – 130% of safe working load and brake is automatically activated – Delivered as standard on Liftstar® winches in CE compliant version.

#### Remote Control

The LS and PS Series can be remote controlled by PHS progressive remote pilot pendant up to 20 meters. This pendant is available in both alloy and cast iron versions and can include an emergency stop.

### Main options for Heavy Series only

#### Rope press roller assembly

Presses the wire rope onto the drum to improve winding, especially at no load conditions. Composite rollers ride on galvanised steel guides for maximum wear and corrosion resistance.

#### Grooved drum

Ensures better rope spooling than plain drum. Allows a greater rope fleet angle up to 2°.

#### Drum auto brake with skid frame or drum auto brake plus disc brake with skid frame

A drum auto brake is available instead of the internal disc brake or as a second brake. (comes with a skid frame). The auto drum brake works independently from the internal disc brake for extra safety.

↔ Drum brake with skid frame on LS2000R

Spooling device on LS5000R

#### Automatic spooling device

Automatically guides back and forth the rope across the drum to ensure proper rope spooling when rope fleet angle exceeds 2°. Avoids dangerous rope built-up situations.

# Liftstar® & Pullstar® Series Air Winches

0.15 - 10t Load Capacity

## LS2-150RLP Dedicated ManRider™

The LS2-150RLP pneumatic ManRiding winch is specially designed for safe and reliable personnel lifting operations by means of a safety harness on offshore rigs and platforms in a heavy duty and critical offshore working environment. It is designed to meet the latest NPD and European machinery directives and is type approved by DNV. It is delivered with the CE mark and an EC declaration of conformity.

LS2-150RLP-L-E

### Features:

- Design factor 10:1 on main load bearing parts.
- Gear type air motor – high starting torque – good spotting capability.
- High efficiency planetary gear box, totally enclosed within the drum.
- Internal automatic multi-disc brake, fully enclosed, plus external automatic drum band brake. The band brake is manufactured from stainless steel for superior corrosion protection. In case of power failure, both the band brake and the disc brake will automatically apply.
- Overload protection, acting at 130% of SWL with automatic activation of brakes.
- Emergency stop device acting directly on the main air supply.
- Slack wire detector – automatically stops the winch from paying out in case of slack wire - designed for vertical rope entry. Roller in composite material.
- Top and Bottom limit switches – stops the winch when the travel exceeds the pre-determined working distance.
- Assisting spooling device – presses the wire rope onto the drum to improve winding, specially at no load condition.
- Rugged stainless steel drum guard – meets stringent European standard EN953.
- Helical grooved drum – allows greater fleet angle up to 2° – designed for 10 mm wire rope.
- Variable speed control with "press and shift" lever. Prevents accidental throttle movements.
- Pre-equipped emergency device – allows both lifting and lowering of the winch in case of main power failure. Connects to a nitrogen bottle (nitrogen bottle as an option).
- FRL package mounted directly on the operator side of the winch.
- Marine paint for corrosion protection.
- Design temperature = -20°C.
- Suitable for zone 1 and 2 as per ATEX directive 94/9/EC – FEM Classification 4m.

### Specifications at 6.3 bar dynamic pressure (when winch is running) – As per DNV regulations

Model number	Rated capacity at top layer (kg)	LIFTING SPEED AT RATED LOAD at top rope layer (m/min)	at lowest rope layer (m/min)	Rated number of layers	Air consumption with rated load (m³/min)	Sound level as per EN 14492-1 dB(A)	Weight without rope (kg)	ATEX marking Ex II 2 GD c IIB 135°C X

(1) Includes option codes "M" and "W2". The DNV certification includes final inspection with performance / load testing, DNV "product certificate" attesting the compliance of the unit as per the DNV type approval requirements, review of the fabrication documentation and supply of 3.1 Material traceability certificates.  
(2) Allows a 50 meter lowering distance or a 25 m lifting distance.

FA Infinity™ Series Air Winches  
0.15 - 10t Load Capacity

Setting the standards in winch technology with time savings, and enhanced safety, Ingersoll Rand FA Infinity™ air winches are known throughout the world for their rugged dependability and quality in the harsh environments.

Featuring heavy duty piston motors, internal gear boxes and fabricated steel frames, FA Infinity™ winches can be made in a variety of configurations to suit particular applications.

Features

Rugged and compact design

- 5:1 design factor at rated load.
- Minimum 18:1 drum diameter to wire rope diameter ratio reduces wire rope wear.
- Compact gearbox-in-drum design.
- Group of mechanism as per FEM: 5m.
- Standard design temperature range is 0°C through 60°C.
- "Lift to shift" winch mounted lever throttle.
- Lifting lugs designed for lifting weight of winch plus full drum of wire rope.

Powerful radial piston air motor

- Positive starting torque.
- Variable speed control. Precision spotting control at slow speeds.
- Superior reliability in harsh environments.
- Internal splash lubrication.

Multiple brake configurations

- Manual drum brake standard (FA10i auto disc is standard).
- Optional auto drum brake and /or auto disc available.
- Enclosed automatic oil bath "wet" disc brake is fully sealed against salt spray, dirt or moisture and provides trouble-free operation over thousands of lifting cycles.

Note: Ingersoll Rand recommends automatic brakes when winches are used for lifting.

Meets worldwide standards

- European standards FEM 5M for lifting.
- U.S. standard ANSI / ASME B30.7
- Duty rating FEM 1Bm / ISO M3.
- Most models either carry or have pending Design Approval by Det Norske Veritas (DNV) and/or the American Bureau of Shipping (ABS).

FA5i-24AK1J1235L-CE

FA Infinity™ C.E. marked models are compliant with the latest European machinery directive No 2006/42/EC and the European standard for power driven winches EN 14492-1. These models include as standard the following safety features: Drum guard — Overload protection — Emergency stop with main air shut-off valve as per EN 418 — Upper / lower limit switches — Automatic brake — Regulator — Exhaust muffler — CE declaration of conformity.

FA Infinity™ winches are, by design, particularly suitable for use in potentially explosive atmospheres, unlike electric winches. They are classified as standard as equipment category 2 for applications in zone 1 and 2 (as per ATEX 94/9/CE directive for surface industry). ATEX marking: **Ex II 2 GD c IIB 135°C X**.

FA Infinity™ Series Air Winches  
0.15 - 10t Load Capacity

Utility Air Winches

Designed for offshore and harsh industrial environments the robust FA Infinity™ utility winches are available with several drum widths and can be equipped with many options for effective adaptation to your application (see pages 20 to 23 for details).

**Top layer rating \***  
(i.e. drum flange diameter less 1.5 times the rope diameter)  
  
\* FA Infinity™ winches will always lift the rated load at any layer of wire rope)

FA7i-24AK1G

**Specifications** at 6.3 bar dynamic pressure (when winch is running) — Working pressure range 5 to 7 bar.

FA Infinity™ Series Air Winches  
0.15 - 10t Load Capacity

Guideline and Podline Air Winches

As offshore oil drilling heads into deeper waters, Ingersoll Rand Guideline and Podline winches are prepared to follow. These specially configured versions of the FA7Ti tall flange air winch feature:

- Top layer ratings insure "lift at any layer" capability.
- 1067 mm drum flange height and length for maximum wire rope capacity. Other drum flange lengths are available.
- Marine 812 ("P" option) corrosion resistant marine finish paint.
- Locking dog, easy to operate, trouble free and maintenance friendly.
- Winch mounted throttle for precise load control.
- Internal oil bath, automatic disc brake, protected from the elements.

Specific to the FA7TiGL Guideline winch:

- A lower gear ratio and switching valve arrangement with pressure regulator preset for unmanned lowering of sub-sea equipment.
- In guideline mode, a pressure regulator can be set to adjust the tension.
- Simply flipping a lever switches the winch from utility to guideline mode. In this mode, the winch can be overhauled at speeds up to 28 m/min.

FA7Ti-GL

Guideline mode control

Locking dog

See dimensions on page 27.

FA Infinity™ Series Air Winches  
0.15 - 10t Load Capacity

FA Infinity™ Series Air Winches  
0.15 - 10t Load Capacity

Dual Rated Offshore ManRider™ Air Winches

Ingersoll Rand’s offering of dedicated and dual purpose (utility & personnel lifting) ManRider™ winches are known worldwide as the standard for meeting the toughest personnel lifting requirements in the industry. Most of these rugged, oilfield tough winches either carry or have pending design approval by Det Norske Veritas (DNV) and/or the American Bureau of Shipping (ABS). Fully type approved models to meet DNV - OS-E101 and ABS - CDS are available upon request. Infinity™ winches also meet UK HSE and PSA regulations for personnel lifting applications.

Meeting world standards

Certified to those standards. Drilling rigs and platforms are used all over the world and come under numerous and diverse regulations. Ingersoll Rand builds to regional and global specifications and our winches can be certified by Det Norske Veritas (DNV), and the American Bureau of Shipping (ABS).

Type approval

A comprehensive design review by a third party addresses intended service, applications, ratings, design calculations, load bearing components, product specifications, and service restrictions or limitations. Plant surveys verify quality control procedures. A Type Approval certificate is then issued for specific units.

TIP:  
What features make a winch a ManRider™ ?

- Minimum design factors of 8:1
- Dual brakes
- Drum guards
- Design preview certs and data books upon request (when requested at time of order)

And, depending on where in the world it will be used

- CE certifications
- Overload devices
- Slack wire detectors
- Limit switches
- Emergency shut-offs
- Emergency lowering devices
- Spooling devices

# FA Infinity™ Series Air Winches

## 0.15 - 10t Load Capacity

### FA Infinity™ Series - Main Options

Automatic drum brake

Drum guard (A option)

Limit switches (option S)

Overload protection with emergency stop

Exhaust mufflers (option J5)

### CE package options

The above options are included as standard equipment in all CE marked winches. They are also available as separate options on non-CE winches. The automatic brake is a compulsory equipment for all CE models but it can be an automatic disc brake or an automatic band brake. Please select the automatic brake option from the brake section (see ordering menu) and add to the CE package option.

- **Drum guard:** prevents the operator from inadvertent contact with winch moving parts.
- **Top and bottom limit switches:** automatically stops the winch when the travel exceeds the pre-determined working distance. The mechanism is environmentally protected. Needs to be adjusted on site as per customer configuration/application.
- **Pneumatic overload protection with emergency stop:** the overload protection automatically stops the winch in case of overload exceeding 125 – 130% of safe working load and brake is automatically activated. The emergency stop allows the operator to quickly stop the winch in case of an emergency situation. Pressing the e-stop button closes a shut-off valve which stops the main air from entering into the motor, brake is applied automatically.
- **Exhaust mufflers (for motor and control):** they consistently reduce the noise level without measurable loss of power. Easy to clean or replace.

### Other options available

Remote control

Drum locking pin

#### Remote pilot pendent throttle

The FA Infinity™ Series can be remote controlled by PHS progressive remote pilot pendent up to 20 meters. This pendent includes an emergency stop on the CE version.

#### Drum locking dog (option L)

Allows to secure the drum for applications that require to maintain loads for long periods.

#### Airline accessories (options J1, J2 and J3)

A good air quality is a key factor for the longevity and the proper functioning of your equipment. These airline accessories, such as filter, regulator and lubricator are specially adapted to our FA Infinity™ winch for optimal performance.

#### Rope press roller assembly (option V)

The press roller minimizes tangles and "birdnesting" of the wire rope and increases its life.

Airline accessories

Rope press roller

# FA Infinity™ Series Air Winches

## 0.15 - 10t Load Capacity

### Other options available (continued)

Grooved drum

#### Grooved drum

Ensures better rope spooling than plain drum. Allows a greater rope fleet angle up to 2°.

#### Construction cage (option E)

Makes using, storing and protecting winches easier than ever. Custom designs for any winch welcome.

Construction cage

#### Adjustable Accu-Spool™ system (option Q)

See description on following page.

### Electric-over-air pendent control system (control option 5XX)

#### Pendent Control

#### Joystick lever type control

Variable speed lever

E-stop

Optional pendent for secondary local control

speed control, the control buttons are depressed and the dial-in knob provides proportional control. The joystick lever control provides traditional winch style variable speed in a hand held or wall mounted control box.

#### Standard features

- Portable, easy to hold control pendent.
- NEMA 4 control box and pendent.
- Holding down the control button and turning the Dial-In control provides variable speed.
- Automatic return-to-centre when joystick is released.
- Emergency stop button on control enclosure.
- Unlimited control length.
- Requires pilot control valve chest for field retrofit.
- Adaptable to most winch models and Hercu-Link hoists.

FA Infinity™ Series Air Winches  
0.15 - 10t Load Capacity

Accu-Spool™ adjustable level wind (option Q)

2 hp radial piston drive motor. Fully enclosed oil bath gear box

Pressure sensing guide rollers

Precision cut rack & pinion drive assembly

Features and benefits

Accu-Spool™ replaces the need for conventional level winding systems. It is available as optional equipment for Ingersoll Rand FA Infinity™ winch Series (except for FA150KGi manriding model).

The pressure activated sensor drive is self adjusting, eliminating the wear and timing issues inherent in diamond screw designs.

This system compensates for fleet angles between 1.5° to 26°.

- Heavy duty radial piston drive motor.
- Fully enclosed oil bath gearbox.
- Precision cut rack and pinion drive assembly.
- Field adjustable to accommodate a variety of wire rope take-off angles.
- Configures for both overwound and underwound wire rope take-off.
- Accepts a range of wire rope sizes without any adjustments to system.
- Manual override of controls for no-load spooling. Accu-Spool™ comes with an independent remote pilot pendent control, allowing the drive head to be moved when the winch is not operating.
- Promotes uniform and even spooling of wire rope.
- Reduces bird nesting and associated problems such crushing and abrasion.

How to order:

Begin with the base model driver and pricing of the FA Infinity™ Series winch you have selected.

Add the model driver option code: "Q" to the your winch model (see ordering menu on following page for complete winch model driver guide).

Note:

If the desired wire rope take-off angle is provided at time of an order the adjustable Accu-Spool™ will be preset for this angle prior to shipment. Otherwise the setting will be at the discretion of the factory.

To prevent inadvertent contact with moving parts only automatic brakes are available on adjustable Accu-Spool™ level winds.

Not all standard FA Infinity™ Series winch options are compatible with the Accu-Spool™ level wind due to mechanical or regulatory issues.

Option **not** compatible with the Accu-Spool™ system:

- Tall flange drums (FA5T and FA7T).
- Manual drum brakes (M brake option).

Adjustable Accu-Spool™ wire rope take-off range

FA Infinity™ Series Air Winches  
0.15 - 10t Load Capacity

FA Infinity™ Series - Ordering Menu

To order your winch, specify complete model number code as shown below:

FA Infinity™ Series winches in CE version are fitted as standard with:

- Drum guard
- Pneumatic overload protection device with emergency stop valve (main air shut-off).
- Rotary limit switches (top and bottom).
- Automatic brake (to be selected between automatic disc brake and automatic drum brake, or both).
- Exhaust mufflers (for control and motor).

FA Infinity™ Series capacity		Drum length	Drum brake	Disc brake	Control	Options

(1) **Airline accessories:** add 1 for filter, 2 for lubricator, 3 for regulator, 4 for strainer, 5 for muffler and 6 for liquidator, e.g. J123. For protection during shipment and due to the wide range of installation variables, the airline accessories are shipped loose for client installation.

(2) **M1, M2 and M3 options:**

**M1** – Material traceability certificates according to EN 10204 (Ex DIN 50049) 2.2 on load bearing parts. This conformity document affirms (by the manufacturer) that parts are in compliance with the requirements of the order based on non-specific inspection and testing (i.e., results are typical material properties for these parts).

**M2** – Material traceability certificates according to EN 10204 (Ex DIN 50049) 3.1 on load bearing parts. These documents affirm (by a department independent of the manufacturing department) that the actual parts used in the product are in compliance with the order based on specific inspection and testing (i.e., results are actual material properties for those parts).

**M3** – Material traceability certificates according to EN 10204 (Ex DIN 50049) 3.1 on load bearing parts. These documents affirm (by a department independent of the manufacturing department) that the actual parts used in the product are in compliance with the order based on specific inspection and testing (i.e., results are actual material properties for those parts in a finished, as delivered condition).

FA Infinity™ Series Air Winches  
0.15 - 10t Load Capacity

FA150KGi-MR Dedicated ManRider™

FA150KGi ManRider™ winches have been designed to meet the requirements of the oil exploration industry, particularly those specifications of the Norwegian Petroleum Directorate and DNV. Most models either carry or have pending design approval by Det Norske Veritas (DNV) and/or the American Bureau of Shipping (ABS). Fully type approved units available by ordering "N4" (ABS) or "N5" (DNV) options.  
**Note:** It remains the user's responsibility to determine the suitability of this product for any particular use and to check for compliance with applicable regulations.

Features

- Piston type air motor
- Automatic internal disc brake.
- Automatic drum brake.
- Slack rope detector.
- Emergency stop and overload limiter.
- Standard design temperature is -20°C.
- Emergency lowering device.
- Lift to shift lever throttle.
- Rotary limit switch.
- Drum guard.
- Press roller.
- Filter, regulator, lubricator air preparation package.
- Muffler.
- 10:1 design factor.
- 18:1 D/d ratio on wire rope.
- CE compliance.
- Marine 812 finish paint "P" standard.

FA150KGi-MR with emergency lowering system option

FA150KGi-MR with pedestal option

See dimensions on page 28.

Specifications at 6.3 bar dynamic pressure (when winch is running) – As per DNV regulations

Model number	Rated capacity at top layer (kg)	LIFTING SPEED AT RATED LOAD		Rated number of layers	Air consumption with rated load (m <sup>3</sup> /min)	Sound level as per EN 14492-1 dB(A)	Weight without rope (kg)	ATEX marking Ex II 2 GD c IIB 135°C X
		at top rope layer (m/min)	at lowest rope layer (m/min)					
FA150KGi-MR	150	29	25	8	14	89	340	✓

Rope capacity in meters

For personnel lifting winches, the working rope capacity corresponds to max. storage capacity less 2.5 layers (i.e. less 25 mm with 10 mm dia. rope)

Model number	Minimum rope breaking force (kN)	Recommended rope diameter (mm)	Cumulated working rope capacities in meters with RECOMMENDED ROPE DIAMETER								Maximum rope storage capacity (m)
			Layer 1	Layer 2	Layer 3	Layer 4	Layer 5	Layer 6	Layer 7	Layer 8	
FA150KGi-MR	15	10	26	54	84	115	148	183	220	259	385

For storage capacities with other rope diameters, use our "drum storage calculator" at the following web address:  
<http://www.ingersollrandproducts.com/lifting/winches/drum.htm>

FA Infinity™ Series Air Winches  
0.15 - 10t Load Capacity

FA150KGi-MR main options

Stainless steel hose package

Manual rope guide

Emergency lowering system

Pedestal base

Type approved models available

Certified to DNV-OS-E101 drilling plant or ABS certification of Drilling Systems.

Marine paint systems

The FA150KGi-MR is delivered as standard with a marine 812 finish paint. Two additional finishing levels are available as an option; marine 812-X paint system and marine 812-X paint system / isocyanate free (detailed list of components and treatments available on request).

Stainless steel hoses

Stainless steel braid reinforced hoses and stainless steel fittings.

Manual rope guide

Manual rope guide mounted on drum guard is available for better rope winding at no load operation.

Emergency lowering system

Per regulatory requirements every FA150KGi-MR winch is equipped with an emergency lowering device (ELD) to allow an (end user supplied) auxiliary air supply to be attached to the winch to facilitate emergency lowering in the event the main air supply is lost. Option "R" is a complete emergency lowering system which includes tank that serves as the air source during emergency lowering. No end user provided lower the load and the accumulator is charged during normal winch operation.

Pedestal base

It allows to raise the winch to working height. Galvanised steel.

Airline Accessories for Air Winches  
Additional Information on Filters, Regulators and Lubricators

Ingersoll Rand ARO-Flo Series

These filters, regulators, lubricators and FRL combinations are designed to keep your air supply in top condition, as well as enable your winch to operate at its peak performance.

Features

- Robust cast aluminium body.
- High-flow filter element with 5-micron filtration.
- Automatic drain.
- Reinforced metal bowls with sight glass.

FRL combinations 3/8" to 1":

- Regulated pressure 0-9.7 bar, max. inlet pressure 17 bar. Flush mount gauge and T-shape wall mount brackets included.

Separated filter, regulator and lubricator 1 1/4" and 1 1/2":

- Regulated pressure 0-8.5 bar, max. inlet pressure 20.7 bar. Gauge and connection nipples to be ordered separately.

**NOTE:** our dedicated ManRider™ air winches are fitted with an air treatment equipment mounted as standard on the product and do not require, as a result, the equipment described hereafter.

ARO-Flo Series equipment is exempt from the EU Directives 2002/95/EC (CE compliance), and 94/9/EC (ATEX 95). ARO-Flo Series is Silicon free and meets 2002/95/EC (RoHS compliance).

# Air Chain Hoists

Ingersoll Rand air hoists have been providing lifting solutions to industries around the globe since the early 1900's.

Today, we offer the broadest range of air operated chain hoists in the world up to 100 t capacity.

Our range includes hoists for high-speed production applications and for the harsh environments found in mines, shipyards, power plants, cement plants, refineries and onshore and offshore platforms.

We pride ourselves in our willingness and ability to take on tough applications with engineered special products.

## CLK & MLK Series Air Chain Hoists 125 - 1000 kg Load Capacity

### CLK Series

The CLK Series air chain hoist has been designed and engineered for production applications for loads up to 500 kg. Incredible durability with an ASME HST-5 rating of A5 (FEM/ISO mechanism classification of 1Am/M4) the CLK Series hoist are duty-rated to go 800 full-load hours between overhauls.

#### Features

- Meets ASME B30.16 specifications.
- Rugged, lightweight and compact design.
- Disc brake is non-asbestos and spring engaged with air release.
- Quiet operation <75 dBA sound levels.
- Upper and lower limit stops prevent dangerous over-travel of the hook.
- Full flow pendent for maximum control and enhanced load positioning.
- 100% duty cycle multi-vane (6) air motor.
- Hook or trolley mounted versions available.
- Steel snap hooks with safety latches.
- Standard lift is 10 feet; additional lifts are available.
- Standard pendent length is 6 feet or 4 feet less than lift.

CLK & MLK

### MLK Series

Serving industry for over 25 years, the rugged and reliable MLK Series hoists are ideal for high production cycle operations. Spark resistant models are also available. MLK Series come with a wide range of options and accessories.

#### Features

- Meets ASME B30.16 specifications
- 100% duty cycle.
- These hoist are ideal for the harsh environments found in steel mills, foundries and electroplating operations. These are also ideal for high duty cycle applications.
- Pull chain or pilot pendent controls provide precise spotting capabilities.
- Self adjusting, air operated disc brake is spring applied and air released. Wear tested to over one million cycles before replacement.
- All rotating parts are supported by either ball or roller type bearings. Unique planetary gearing system assures long life.
- Thoughtful design includes parts interchangeability, inlet swivels, exhaust air chain lubrication, control adjustment screws and easy conversion from pull chain to pendent control.
- Spark resistant models and a wide range of options and accessories are available.

CLK and MLK Series are particularly suitable for use in potentially explosive atmospheres. In their standard design, they are classified as equipment category 3 for applications in zone 2 as per ATEX 94/9/CE Directive (ATEX marking Ex II 3 GD c IIB 135°C X). **MLK Series** are also available in spark resistant, version for use in explosive atmospheres zone 1 (ATEX marking Ex II 2 GD c IIB 135°C X).

(1) Sound pressure levels are measured per European standard EN 14492-2 — (2) Weight with standard height of lift (3 m) and standard length of control (2 m).  
(3) Also available with hand chain control on request.

### CLK Series - Hook-mount configuration

### MLK Series - Hook-mount configuration

\* Dimension for a 14 m capacity fabric chain bucket (1 fall). For a 24 m capacity metallic chain bucket (1 fall), add 153 mm.

# CLK & MLK Series Air Chain Hoists

## 125 - 1000 kg Load Capacity

### MLK Series in standard trolley mount configuration with RT010 trolley – Plain (DA) or motorised (HA)

### MLK Series in trolley mount configuration for wide beam – TIR6600 trolley / motorised only (HD)

### Ordering menu

CLK hoists are delivered as standard in compliance with the European machinery directive 2006/42/EC and the European standard for Power Driven Hoists EN 14492-2. They include as standard a main air emergency stop and a chain bucket. For CLK under manual trolley, see separated trolleys on page 66.

Series / load capacity	Control type	Suspension	Lift in ft	Control length in ft (4)	Standard equipment
CL125K 125 kg CL250K 250 kg CL500K 500 kg	2 Full flow pendent control	A Fixed lug (Rigid mounting part for RT010A trolley) C Top hook	10 Standard 10 feet (3 m) 15 Standard 15 feet (4.5 m) 20 Standard 20 feet (6 m) XX Above 20 ft, specify height of lift in feet (200 ft max. for CL125K & 250, 100 ft max. for CL500K)	C6 6 feet (1.8 m) C13 13 feet (4 m) C18 18 feet (5.5 m) CX Specify length of control in feet (40 ft / 12 m max. pendent hose length),	U Chain bucket, 40 ft of lift capacity for CL125K and CL250K, 20 ft of lift capacity for CL500K -E Compliance with the European machinery directive (includes emergency stop as standard)

(4) In order to reduce the control response time, quick exhaust valves are required from 19 ft (5.8 m) of pendent hose length. Valves need to be evenly spaced between pendent handle and hoist on "up" and "down" hoses. From 19 ft to 30 ft (5.8 to 9 m), 1 valve per hose is required — From 30 ft to 40 ft (9 to 12 m), 2 valves per hose are required. Valve part no. MR-939-6

MLK CE marked models are compliant with the European machinery directive 2006/42/EC and the European standard for power driven hoists EN 14492-2. They include as standard a main air emergency stop (not required with pull cord control). For hoists with trolley, also specify beam size, type and flange width.

Series / load capacity	Control type	Suspension	Lift in ft	Control length in ft	Options
<b>Standard Series</b> ML250K 250kg ML500K 500kg ML1000K 980kg	1 Cord control (not available for hoist under motorised trolley) 2 PHS pendent 3 Two motor PHS Pendent (for hoist & trolley)	C Swivel top hook (not for spark resistant model) DA Plain rigid universal trolley HA Vane motor driven universal trolley HD Vane motor driven universal trolley for wide beam	10 Standard 10 feet (3 m) XX Specify height of lift in feet, e.g. 10 = 10 ft (3 metre)	CX Specify length of control in feet, for standard models, e.g. C6 = 6 ft (1.8 metre) RX Specify length of control in ft, for spark resistant models, e.g. R6 = 6 ft (1.8 metre)	S Chain container steel, 24 m capacity (1 fall) U Chain container fabric, 14 m capacity (1 fall) -E Compliance with the European machinery directive (6)
<b>Spark Resistant Series (5)</b> ML250KR 250kg ML500KR 500kg		R Bronze hook (only for spark resistant model)			

(5) Spark Resistant Series include top and bottom hooks in bronze and stainless steel load chain. In addition, copper plated trolley wheels when fitted with trolley.  
(6) There is no need to select "-E" when the hoist is fitted with cord control.

# Liftchain® Series Air Chain Hoists

## 1.5 - 100t Load Capacity

The Liftchain® LC2A Series is the result of a long experience in heavy load lifting applications in the most difficult and extreme environments around the world. Setting new standards for safety and reliability, the LC2A Series is intended for tough industrial applications on offshore oil rigs, shipyards, petrochemical, refineries, foundries, steels mills, mining, tunneling, etc...

### Features

- Rugged, compact design & light weight with all steel construction for better durability.
- Particularly adapted for difficult environments – Insensitive to dust and humidity. 100% duty cycle.
- Exclusive gear type air motor with better ability than other motors to accept contaminated air. High starting torque ensuring good spotting capability.
- Virtually maintenance free and reduced downtimes.
- Automatic multi disc brake, fully enclosed for better protection and corrosion resistance. Maintenance free, no adjustment required. Low pressure brake with self cleaning "venturi effect".
- Precision control with infinitely variable speed through pilot pendent or pull chain control.
- Overload protection device delivered as standard on CE marked versions, optional on Non-CE versions.
- Main air emergency stop as standard on CE marked versions, optional on Non-CE versions.
- Upper and lower limit switches, integrated in the hoist body for better protection. Allows the hoist to be also used in horizontal position. No adjustment required.
- Calibrated load chain, grade 80. Corrosion resistant treated for better protection and longer life. 5:1 design factor for safety and durability.
- Improved exhaust muffler. Low noise level. Easy cleaning and easy replacement.
- Meets worldwide standards: European standards FEM9.511 and FEM 1001 for lifting. U.S. standard ASME/ANSI B30.16. Duty rating FEM 1Bm / ISO M3.
- Several types of configuration are available: hook-mount, trolley-mount versions, low headroom versions for use in restricted spaces, and mining versions fitted with specific equipment.

CE marked models are compliant with the latest European machinery directive N° 2006/42/EC and the European standard for power driven winches EN 14492-2. These models include as standard the following safety features: Built-in overload protection device — Emergency stop at pendent and built-in main air shut-off as per EN 418 — CE declaration of conformity.

LIFTCHAIN® air hoists are particularly suitable for use in potentially explosive atmospheres, unlike electric hoists. In their standard design, they are classified as equipment category 3 for applications in zone 2 as per ATEX 94/9/CE Directive (ATEX marking **Ex II 3 GD c IIB 135°C X**). For more hazardous areas such as zone 1, they are offered with a special spark resistant package (ATEX marking **Ex II 2 GD c IIB 135°C X**). Special mining models are classified as equipment category M2. ATEX marking **Ex IM 2 CX**.

# Liftchain® Series Air Chain Hoists

## 1.5 - 100t Load Capacity

### "Miner" Series

The Mining models are designed for the heavy duty conditions found in the underground mining and tunneling industries.

Their construction is based on the standard LC2A models.

#### Main differences compared to the standard LC2A models:

- Suitable to operate at 4 bar.
- Top hook mounted on chain links for increased flexibility. 1 extra bottom hook (optional) for alternate pulling operation.
- Top and bottom limit switches through resistant buffer stops which comes against the hoist central part.
- Cast iron pendent control.

**Specifications** at 4 and 6.3 bar dynamic pressure (when hoist is running) — Working pressure 4 to 7 bar.  
**As per European standard EN range 14492-2** – Group of mechanism as per FEM 1Bm / ISO M3.

LC2A120DSM	79	179	16 x 45	11.4

(1) Sound pressure levels are measured per European standard EN 14492-2  
 (2) Weight measured with standard height of lift (3 m) and standard length of control (2 m).

**Note:** It is strongly recommended to use a lubricating and a filtration system on the compressed airline. The compressed air temperature must not exceed 65°C at the motor air inlet. For higher temperature, please consult us.

See dimensions on page 46.

# Liftchain® Series Air Chain Hoists

## 1.5 - 100t Load Capacity

### LIFTCHAIN® Air Chain Hoists Main Options

#### Spark resistant package, option T1, for ATEX zone 1

A special spark resistant package is available for products used in potentially explosive areas classified as ATEX zone 1.

Products ordered with this option will have the ATEX marking EX II 2 GD c IIB 135°C.

The package includes the following features:

#### For the hoist:

- Cast iron pendent.
- Bronze coated bottom hook assembly.

#### For the trolley:

- Solid bronze wheels.
- Pinion drive in solid bronze or stainless steel.
- Cast iron pendent.
- Bronze coated hand wheel for geared trolley.
- Brass hand chain guide for geared trolley.

#### Types of suspensions

The Liftchain® Series are scheduled for many configurations, from simple hook or fixed lug, to various types of trolleys (plain, geared or motorised). See the ordering menu on following page for the complete list of suspension types.

#### Chain containers, option A, B, C or D

Chain containers are a simple and economical way of capturing the load chain and preventing it from interfering with the load, hoist control cords, or other objects. They are available in canvas or in zinc plated steel according to their chain capacity.

#### Airline accessories, options J1, J2 and J3

A good air quality is a key factor for the longevity and the proper functioning of your air hoists. Optional airline accessories, such as Filter, Regulator and Lubricator, specially adapted to our LC2A hoists, are available on request.

#### Rack & pinion option

Rack & pinion drive are usually used on floating installations or vessels. This positive drive design keeps the hoist trolley in position in the event of heavy swell (no sliding on the beam). It also allows precise travel positioning when operating.

Liftchain® Series Air Chain Hoists  
1.5 - 100 t Load Capacity

LIFTCHAIN® Series Ordering Menu

To order your hoist, specify complete model number code as shown below. For hoists with trolley, specify beam size, type and flange width. Note that 0 (zero) is a number, not a letter in model part numbers.

LC2A in CE version are fitted as standard with built-in overload protection and emergency stop button on pendent and built-in main air shut-off valve.

LC2A Series from 1.5 to 25 t capacity

# Airline Accessories for Air Hoists

## Additional Information on Filters, Regulators and Lubricators

### Ingersoll Rand ARO-Flo Series

These filters, regulators, lubricators and FRL combinations are designed to keep your air supply in top condition, as well as enable your hoist to operate at its peak performance.

#### Features

- Robust cast aluminium body.
- High-flow filter element with 5-micron filtration.
- Automatic drain.
- Reinforced metal bowls with sight glass.

#### FRL combinations 3/8" to 1":

- Regulated pressure 0-9.7 bar, max. inlet pressure 17 bar. Flush mount gauge and T-shape wall mount brackets included.

#### Separated filter, regulator and lubricator 1 1/4" and 1 1/2":

- Regulated pressure 0-8.5 bar, max. inlet pressure 20.7 bar. Gauge and connection nipples to be ordered separately.

ARO-Flo Series equipment is exempt from the EU Directives 2002/95/EC (CE compliance), and 94/9/EC (ATEX 95). ARO-Flo Series is Silicon free and meets 2002/95/EC (RoHS compliance).

# BOP Handling Systems

For over 30 years Ingersoll Rand has designed, manufactured and serviced hundreds of blowout preventer handling systems for all the major drilling contractors and oil companies in the industry.

Our experience with this complex and critical lifting application enables us to provide the type of equipment, engineering support, and certifications that these projects require.

Our commitment to safety and quality combined with our long experience with difficult lifting applications allows us to provide our clients with the safest and most cost-effective solutions possible.

## BOP Handling Systems 25 - 200 t Load Capacity

Our BOP Handling Systems are designed to meet or exceed the specifications of one or more of the following regulatory bodies; the Norwegian Petroleum Directorate (NPD), UK HSE, Lloyds Register of Shipping (LRS), Det Norske Veritas (DNV), and American Bureau of Shipping (ABS) for the oilwell drilling industry.

All Ingersoll Rand BOP handling systems are designed and built in ISO9001 certified factories. They are comprised of two trolley-mounted hoists; each of which is rated at one-half the complete system capacity.

### Features

- 5:1 design factor combined with all steel and cast iron construction to withstand the brutal environmental and mechanical challenges of the job.
- Automatic multi-disc brakes that engage instantly the moment the controls are released.
- High efficiency planetary gear boxes that are fully sealed to exclude contaminants.
- Space saving modular designs require no deck space, offer low headroom and improved end approach. Ultra-low headroom models are available for applications with severe envelope restrictions.
- Choice between two types of pneumatic motor, including compact gear type motor (**BS Series** BOP handling systems) and high-torque radial piston motor (**BHS Series** BOP handling systems). Air motors provide built-in overload protection since they will stall without damaging hoist.
- Smooth, precise and safe load control with variable speed pendent control.
- Rugged corrosion-resistant load chain in 16, 22 and 32 mm sizes with greater elongation and therefore, with more resistance to shock loading. The large links provide for easier external inspection, excellent resistance to abrasion, and will last indefinitely when properly maintained.
- True vertical lift which enhances load control characteristics and safety.
- Articulated trolleys accommodate limited side pulling as BOP stack is being lifted.

### Engineered options

- Rack and pinion trolley drive option for positive traction and improved horizontal load control.
- Severe duty packages available for cold weather, marine and explosion-proof environments, including ATEX.
- Remote control pendants and consoles.
- Spark and corrosion resistant components.
- Festooning systems.
- Trolleys for custom fabricated beams.
- Clevis and shackle bottom block assemblies.
- Low pressure 4 bar (57 psi) applications.

Certificate No. FM53539

Certificate No. QUAL/1991/309e

CE marked models are compliant with the latest European machinery directive No 2006/42/EC and the European standard for Power Driven Hoists EN 14492-2. These models include as standard an emergency stop on pendent and main air shut-off valve as per EN 418 standard, an overload protection and a CE declaration of conformity.

The BS and BHS BOP handling systems are particularly suitable for use in potentially explosive atmospheres. In their standard design, they are classified as equipment category 3 for applications in zone 2 as per ATEX 94/9/CE Directive (ATEX marking **Ex II 3 GD c IIB 135°C X**). For more hazardous areas such as zone 1, they are offered with a special spark resistant package (ATEX marking **Ex II 2 GD c IIB 135°C X**).

# BOP Handling Systems

25 - 200 t Load Capacity

## BS Series Specific Features

All models meet the requirements of the European standards FEM 9.511 and FEM 1001 for lifting as well the U.S. standard ASME/ANSI B30.7.

- Gear type air motor – hoist and trolley.
- 5:1 design factor.
- Standard design temperature TD = -20°C for BS25LC2A2 to BS50LC2A4. TD = -10°C for other models.
- All steel/cast iron construction.
- Automatic fail safe multi disc, motor brake on hoist and trolley
- Articulated trolley allows limited side pulling operations
- Fully enclosed planetary gear box
- Compact modular design
- Corrosion resistant load chain
- 9 m height of lift standard on all models
- Bottom block mounted on bearing with external lubrication point and water drain
- PHS progressive piloted pendent control - 9 m length as standard.
- Limit switch for upper and lower over-travel protection.
- Lifting lugs for easy installation.
- Filter-lubricator-regulator air preparation package mounted on unit.
- Corrosion resistant marine 812 finish paint.
- Galvanised steel chain container.
- Trolley guide rollers, rubber bumpers, and rail sweeps.
- Manufacturer test certificate and maintenance manual.
- Exhaust mufflers.

### Ingersoll Rand gear air motor is characterised by:

- A unique design with only two moving parts, making it ideal for severe applications in hot, cold, dusty, dirty, explosive and wet conditions.
- A reduced sensitivity to long storage period or long period with no use.
- A low air consumption.
- A variable speed control offering a precision spotting control at slow speeds.

**WARNING:** Standard hoist / trolley combinations purchased for BOP handling will void the warranty. They are not designed for this type of application.

# BOP Handling Systems

25 - 200 t Load Capacity

## BS Series Specifications

BS BOP handling systems are comprised of two trolley-mounted hoists. The total system capacity corresponds to the addition of the rated capacity of both hoists.

**Specifications** at 6.3 bar dynamic pressure (when BOB handling system is running) — Working pressure 5 to 7 bar.  
**As per European standard EN range 14492-2** – Group of mechanism as per FEM 1Bm / ISO M3.

System model number	System capacity (t)	Falls of chain per hoist	Min. headroom (mm)	Lifting speed at rated load (m/min)	Lowering speed at rated load (m/min)	Motor power per hoist (hp)	Air cons. per hoist (m³/min)	Sound level (1) (dB(A))	System weight (2) (kg)	Chain size (mm)	Chain weight/ 1m extra lift (kg)

(1) Sound pressure levels are measured per European standard EN 14492-2.  
(2) Weight of the complete system (2 hoists) with standard height of lift (9 m) and standard length of control (9 m).  
(3) In Rack & Pinion configuration, the trolley speed is divided by 2.

BS Series - Standard Equipment & Options

In standard version, BS Series BOP handling systems are fitted with the following equipment:

- Articulated trolley hoist allows limited side pulling operations.
- 2 motor PHS piloted pendants (one per combined hoist/trolley).
- Corrosion resistant load chain with 9 m height of lift as standard.
- Limit switch for upper and lower over-travel protection.
- Corrosion resistant Marine 812 finish paint.
- Galvanised steel chain container.
- Filter-Lubricator air preparation package mounted on unit.
- Trolley guide rollers, rubber bumpers and rail sweeps.
- Exhaust mufflers.
- Manufacturer test certificate and maintenance manual.

Articulated trolley hoist

Integrated limit switches

Galvanised steel container

Air preparation package

Rubber bumpers & rail sweeps

PHS pendant with emergency stop

In CE compliant version, BS Series BOP handling systems are fitted with the additional following equipment:

- Built-in overload protection.
- Emergency stop button on pendant, acting on main air shut off valve.
- CE declaration of conformity.

Overview of some available options

Rack & pinion drive

For positive traction. On BS series with rack & pinion configuration, the standard trolley speed is divided by 2. The racks have to be ordered separately and have to be welded on the beam by the customer.

Clevis and shackle attachment

Fitted in lieu of the bottom hook. The clevis can be configured according to specific criteria on request.

Spark resistant package, option T1, for ATEX zone 1

The T1 spark resistant option is designed for applications in zone 1 as per ATEX 94/9/CE Directive. It includes as standard:

- **On the trolleys**, solid bronze wheels and pinion drive in solid bronze or stainless steel. Stainless steel pins and fasteners (10 mm and smaller) and 20µ zinc plated fasteners (11 mm and larger).
- **On the hoists**, bronze coated bottom hook assembly and cast iron pendent (for control of both hoist and trolley). Stainless steel pins and fasteners (10 mm and smaller) and 20µ zinc plated fasteners (11 mm and larger).

Rack & pinion drive

Clevis & shackle attachment

Bronze coated bottom hook assembly

Solid bronze wheels on trolley

BS Series Ordering Menu

To order your BOP handling system, specify complete model number code as shown below. Also specify beam size, type and flange width.

BS100LC2A		4	P3	ER	9M9	T1-E
Series / Load capacity		Chain falls	Control	Beam type	Lift & control	Options
BS25LC2A	2 x 12.5 t	2	2 motor PHS pendent	E Flat beam*	9M9 Standard: 9 m height of lift and 9 m of control	LM Low temperature design (TD = -20°C). Includes 3.1 material traceability certificates.
BS30LC2A	2 x 15 t			N Tapered beam*		M 3.1 material traceability certificates (1)
BS36LC2A	2 x 18 t	3		* Add the letter "R" for Rack & Pinion configuration (e.g. ER)	9M9 Specify heights in meters	N Clevis instead of bottom hook
BS40LC2A	2 x 20 t					QZ Offshore paint including sandblast
BS50LC2A	2 x 25 t	4				T1 Spark resistant package for zone 1 (see details on previous page)
BS75LC2A	2 x 37.5 t					W1 ABS witness test

BS150LCA	2 x 75 t					W3 LRS witness test
BS200LCA	2 x 100 t					W4 Client witness of load test
						-E Compliance with the European machinery directive.

(1) Material traceability certificates according to EN 10204 (Ex DIN 50049) 3.1 on load bearing parts.

Ultra-Low Headroom Versions

The BS Series BOP handling systems can be designed in ultra-low headroom version for applications requiring a very limited working height — range of capacities from 50 to 200 t.

The minimum headroom of these products is only slightly greater than the size of the bottom hook assembly !

Please consult us for further details on description and specifications.

Note: the design of the ULBS Series does not allow an articulated connection between the trolley and hoist.

See dimensions on page 55.

Specifications at 6.3 bar dynamic pressure (when BOB handling system is running) — Working pressure 5 to 7 bar.

BHS200M  
(one 100t hoist shown)

BHS Series  
Specific Features

Designed to meet or exceed specifications of one or more of the following regulatory bodies - the Norwegian Petroleum Directorate (NPD), UK HSE, Lloyds Register of Shipping (LRS), Det Norske Veritas (DNV), and American Bureau of Shipping (ABS) for the oilwell drilling industry

All models meet the requirements of the European standards FEM 9.511 and FEM 1001 for lifting as well the U.S. standard ASME/ANSI B30.7.

- Radial piston air motor – hoist and trolley.
- 5:1 design factor.
- Standard design temperature TD = 0°C.
- All steel construction.
- Automatic fail safe, multi disc, motor brake on hoist.
- Articulated trolley allows limited side pulling operations (standard on all models - not available for BHS200M).
- Fully enclosed planetary gear box.
- Compact modular design.
- Corrosion resistant load chain.
- 9m height of lift standard on all models.
- Bottom block mounted on bearing with external lubrication point and water drain.
- Accu-Trol™ pendent with "emergency stop/start" feature and 9 m pendent hose.
- Limit switch for upper and lower over-travel protection.
- Lifting lugs for easy installation.
- Filter-Lubricator air preparation package mounted on unit.
- Corrosion resistant Marine 812 finish paint.
- Galvanised steel chain container.
- Trolley guide rollers, rubber bumpers, and rail sweeps.
- Manufacturer test certificate and maintenance manual.
- Exhaust mufflers.

**Ingersoll Rand radial piston air motor is characterised by:**

- A positive starting torque.
- A variable speed control offering a precision spotting control at slow speeds.
- A superior reliability in harsh environments.
- Features an internal splash lubrication.

**WARNING:**

Standard hoist / trolley combinations purchased for BOP handling will void the warranty. They are not designed for this type of application.

BOP Handling Systems  
50 - 200 t Load Capacity

BHS Series Specifications

BHS BOP handling systems are comprised of two trolley-mounted hoists. The total system capacity corresponds to the addition of the rated capacity of both hoists.

BHS100M  
(one 50t hoist shown)

(1) Sound pressure levels per hoist – measured per European standard EN 14492-2.  
(2) Weight of the complete system (2 hoists) with standard height of lift (9 m) and standard length of control (9 m).

BHS Series - Standard Equipment & Options

In standard version, BHS Series BOP handling systems are fitted with the following equipment:

- Articulated trolley hoist allows limited side pulling operations (except for BHS200M)
- Accu-Trol pendent with start / stop button.
- Corrosion resistant load chain with 9 m height of lift as standard.
- Limit switch for upper and lower over-travel protection.
- Corrosion resistant Marine 812 finish paint.
- Galvanised steel chain container.
- Filter-Lubricator air preparation package mounted on unit.
- Trolley guide rollers, rubber bumpers, and rail sweeps.
- Exhaust mufflers.
- Manufacturer test certificate and maintenance manual.

Articulated trolley hoist

Accu-Trol™ pendent handle

Corrosion resistant load chain

Limit switches

Air preparation package

Trolley guide rollers, rubber bumpers & rail sweeps

Exhaust mufflers.

In CE version, BHS Series BOP handling systems are fitted with the additional following equipment:

- Built-in overload protection.
- Emergency stop button on pendent, acting on main air shut off valve.
- CE declaration of conformity.

Options

- Variable lengths of lift and pendent control hose.
- Rack and pinion trolley drive for positive traction.
- Clevis and shackle attachment in lieu of bottom hook.
- Corrosion resistant Marine 812-X paint system.
- Sandblast and carbozinc (primer only).
- 4 bar (57 psi) application models.
- Festooning systems.
- Trolleys for shipyard fabricated beams.
- Custom paint coating systems per owners specifications.

- Spark and corrosion resistant (S•COR•E) package. The S.COR.E spark resistant option for BHS Series is designed for applications in zone 1 as per ATEX 94/9/CE Directive. It includes as standard:  
**R option:** The product will be equipped with copper plated load hook(s) and trolley wheels. Zinc plated load and hand chain if applicable.

Copper plated load hook

BHS Series Ordering Menu

To order your BOP handling system, specify complete model number code as shown below. Also specify beam size, type and flange width.

Series/Load capacity		Trolley Type	Flange adjust.	Control	Lift in feet	Control Drop	Options
BHS50	2 x 25 t	M* Piston motor trolley.	A Standard.	5 1 motor pendent (2 buttons with on-off).	30 Standard height of lift 30 ft (9 m).	30 Standard drop and/or hand chain drop in feet.	C1M3 ABS minus 20 degree C design temperature (tD).
BHS75	2 x 37.5 t	RT* Rack and pinion trolley drive for tapered beam flange.	B 50 mm extension.	6 2 motor pendent (4 buttons with on-off).	XX Specify height in feet.	XX Specify control drop in feet.	C2M3 DNV minus 20 degree C design temperature (tD).
BHS100	2 x 50 t	RF* Rack and pinion trolley drive for flat beam flange.  * Add the number "22" only for model BHS150 (e.g. BHS150M22...)	C 100 mm extension.	7 3 motor pendent (6 buttons with on-off).			K Clevis (in place of bottom hook).
BHS150	2 x 75 t		D 150 mm extension.				M1 Per DIN 50049/EN10204 Para 2.2 "typicals" (T).
BHS200	2 x 100 t						M2 Per DIN 50049/EN10204 Para 3.1 actual per product as purchased (T).
							M3 Per DIN 50049/EN10204 Para 3.1 actual per product as delivered in final condition (T).
							N4 American Bureau of Shipping "Certification of Drilling Systems".
							N5 Det Norske Veritas "DNV-OS-E101 Drilling Plant".
							P1 Marine 812-X paint system.
							P2 Marine 812-X Paint System (isocyanate free paint system).
							R Copper plated (S•COR•E package). The product will be equipped with copper plated load hook(s) and trolley wheels.
							W1 ABS witness test.
							W2 DNV witness test.
							W3 LRS witness test.
							W4 Customer witness test.
							-CE Compliance with the European machinery directive.

(1) NOTES:

**M1** – Material traceability certificates according to EN 10204 (Ex DIN 50049) 2.2 on load bearing parts. This conformity document affirms (by the manufacturer) that parts are in compliance with the requirements of the order based on non-specific inspection and testing (i.e. results are typical material properties for these parts).

**M2** – Material traceability certificates according to EN 10204 (Ex DIN 50049) 3.1 on load bearing parts. These documents affirm (by a department independent of the manufacturing department) that the actual parts used in the product are in compliance with the order based on specific inspection and testing (i.e. results are actual material properties for those parts).

**M3** – Material traceability certificates according to EN 10204 (Ex DIN 50049) 3.1 on load bearing parts. These documents affirm (by a department independent of the manufacturing department) that the actual parts used in the product are in compliance with the order based on specific inspection and testing (i.e. results are actual material properties for those parts in a finished, as delivered condition).

Ingersoll Rand also  
offers manual trolleys  
to equip your small  
capacity hoists and  
manual hoists which  
are very useful for  
casual material  
handling work.

Manual Equipment  
Manual Lever Hoists

L5H Series

Heavy duty, high performance lever hoists

- Torsion-Lok™ brake system ensures positive brake engagement.
- 360° rotation handle needs only 15° handle movement to ratchet loads. A big plus in tight spaces.
- Rugged steel construction.
- Colour coded red/green indicator (load or free chain).
- Simple one-hand free chaining operation.

Model number	Nominal load capacity (t)	Pull to lift rated load (kg)	Number of falls	Height of lift (m)	Weight with 1.5 m lift (kg)	Chain weight/ 1m extra lift (kg)	DIMENSIONS

SLB Series

High performance, industrial lever hoists

- Automatic inertia brake – Engages if load is applied in free-chain mode, helping minimise operator setup error.
- Stamped steel construction for decreased weight and better impact resistance.
- Nickel/chrome plated for improved corrosion resistance.
- Efficient gear reduction for low handle effort.
- Easy one-handed operation for free chain positioning.

Manual Equipment  
Manual Hand Chain Hoists

VL2 Series

Premium hand chain hoists. Heavy duty, high performance

- Best in class hoists, built to be durable.
- High strength gear case and steel frame.
- Exclusive hand chain guide for smooth operation – Helps eliminate jamming when operated away from the load area. Ideal for "pick and drift" applications.
- Efficient gear reduction for easier lifting.
- Open frame design for self-cleaning, quick load sheave inspection and easy hoist maintenance.
- Premium alloy steel grade 100 load chain.
- Overload protection as standard.

VL2 hand chain guides.

VL2-020

## Manual Hand Chain Hoists & Pullers

### SMB Series

High performance and durable hand chain hoists

- Stamped steel construction for decreased weight and better impact resistance.
- Nickel/chrome plated for improved corrosion resistance.
- Efficient gear reduction for easier lifting.
- Zinc plated hand chain as standard.
- Standard overload protection to reduce abuse and increase safety.

### P & C Series

Ratchet pullers – steel and aluminium

- 4:1 design factor for pulling applications.
- All models (except P15H) can be used in one or two falls configuration.
- Galvanised wire rope. C400S is fitted with non-conductive synthetic strap.
- **P15 Series:** all steel construction, plated for long life.
- **C400 Series:** lightweight aluminium design. Reversible handle for easy position changes.

## Manual Trolleys

### PT & GT Series Trolleys

Durable plain and geared trolleys

- 5:1 design factor for use with manual or powered hoists.
- Strong and durable steel construction, includes drop stops.
- Cast iron wheels with sealed, lube for life ball bearings.
- Universal profile to fit IPN and IPE beams.

PT Series plain trolleys: Available from 0.5 to 10 t capacity.

GT Series geared trolleys:

Available from 1 to 20 t capacity. Standard hand chain height 3m, or more on demand.

Ingersoll Rand (NYSE:IR) advances the quality of life by creating and sustaining safe, comfortable and efficient environments. Our people and our family of brands — including Club Car®, Ingersoll Rand®, Schlage®, Thermo King® and Trane® — work together to enhance the quality and comfort of air in homes and buildings, transport and protect food and perishables, secure homes and commercial properties, and increase industrial productivity and efficiency. Ingersoll Rand products range from complete compressed air systems, tools and pumps to material handling systems. The diverse and innovative products, services and solutions enhance our customers' energy efficiency, productivity and operations. Ingersoll Rand is a \$14 billion global business committed to a world of sustainable progress and enduring results.
