Subtech Offshore Services Nigeria

Expertise for the **extremes**

EXPERTISE FOR THE EXTREMES

Fully integrated subsea services

Where operations necessitate niche or technically complex project scopes in harsh environments, Subtech Offshore Services Nigeria is the trusted partner for critical expertise in safe, efficient, and effective delivery.

As one of the few approved IOC diving subcontractors in Nigeria, carrying out Air and SAT diving, Subtech Offshore Services Nigeria provides specialised services to the region, across the full life cycle of offshore projects. From construction, IRM, decommissioning solutions and support services, Subtech Offshore Services Nigeria delivers innovative solutions that promote operational and cost-effectiveness.

With significant project delivery experience and dedicated local resources, Subtech Offshore Services Nigeria is able to react quickly to fully support the rapid mobilisation of critical offshore projects. Operating on a global scale, we use industry leading practices to deliver first-class results for any project scope.

James Fisher and Sons plc

Listed on the London stock exchange, James Fisher is a leading provider of specialist services to the energy and other high integrity industries worldwide, employing over 2,600 staff in over 40 countries. This global footprint reflects the diverse range of customers and markets served. With its network of group company facilities, partners, agents and support bases, it operates worldwide to deliver flexible, highly responsive and localised support to its customers.

Accreditations

Strong West Africa presence

- Ghana
- Nigeria
- Gabon
- Equatorial Guinea

Nigeria subsea and offshore services

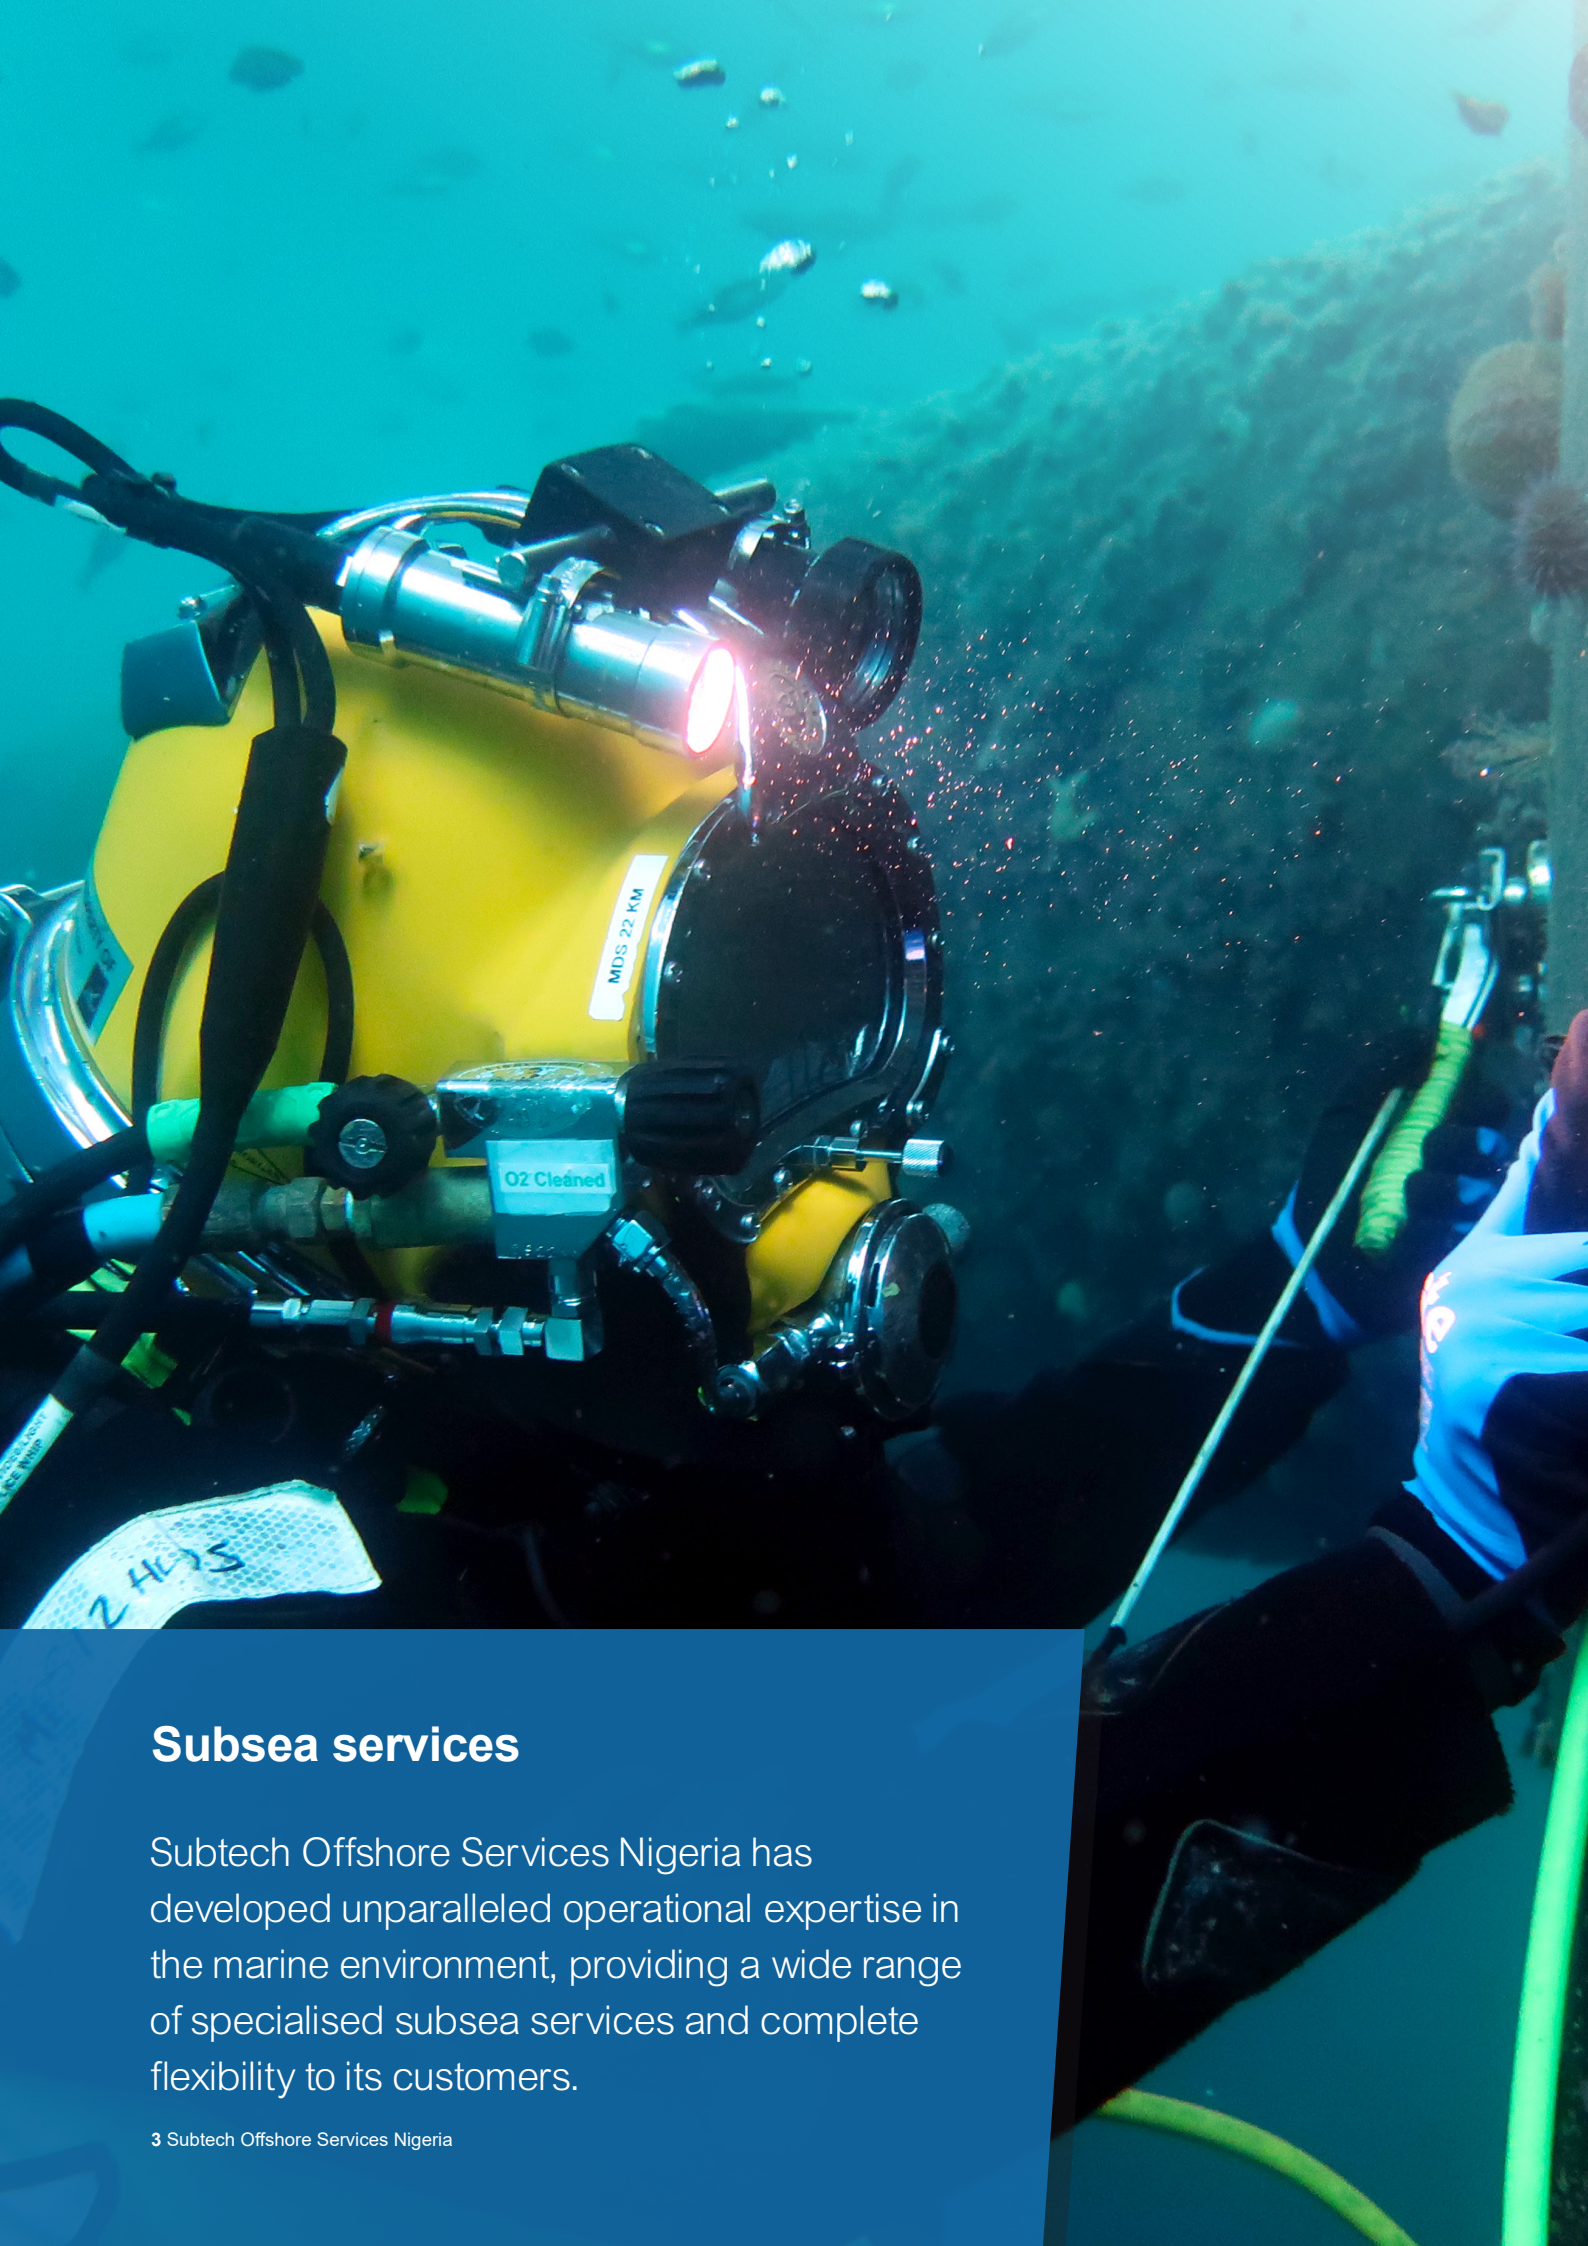

In Nigeria, we have an established local presence, including equipment and personnel, focussing on a range of services including Air and Saturation Diving.

With extensive project management experience in mobilising and operating third party vessels, including Sat DSVs, to deliver turnkey solutions we have successfully completed challenging scopes for a wide range of tier 1 contractors and global energy clients.

HSEQ

Subtech Offshore Services Nigeria is committed to providing a safe working environment for all stakeholders and Health, Safety, Environment and Quality (HSEQ) matters are at the forefront of project delivery. We meet all relevant local legislation and ensure compliance with industry best practises; this is demonstrated through our membership of organisations such as the International Marine Contractors Association (IMCA).

We are committed to the health, safety and welfare of our staff and those that work with and alongside us.

Subsea services

Subtech Offshore Services Nigeria has developed unparalleled operational expertise in the marine environment, providing a wide range of specialised subsea services and complete flexibility to its customers.

Diving and Inspections

Subtech Offshore Services Nigeria is a member of the International Marine Contractors Association (IMCA) and accredited by all of the major class societies. We offer a wide range of Non-Destructive Testing (NDT) and inspection services, with particular experience in special surveys and class renewal surveys.

Air & SAT Diving
