EXPERTISE FOR
THE EXTREMES

EXPERTISE FOR THE EXTREMES

Fully integrated subsea services

Where operations necessitate niche or technically complex project scopes in harsh environments, James Fisher Subtech is the trusted partner for critical expertise in safe, efficient, and effective delivery.

James Fisher Subtech provides specialised services to the Middle East, across the full life cycle of offshore projects. From construction, IRM, decommissioning solutions and support services, James Fisher Subtech delivers innovative solutions that promote operational and cost-effectiveness.

With significant project delivery experience and dedicated local resources, James Fisher is able to react quickly to fully support the rapid mobilisation of critical offshore projects.

Operating on a global scale, we use the latest technology to deliver first-class results for any project scope.

James Fisher and Sons plc

Listed on the London stock exchange, James Fisher is a leading provider of specialist services to the energy and other high integrity industries worldwide, employing over 2,600 staff in over 40 countries. This global footprint reflects the diverse range of customers and markets served. With its network of group company facilities, partners, agents and support bases, it operates worldwide to deliver flexible, highly responsive and localised support to its customers.

Middle East subsea and offshore services

In the Middle East, we have extensive regional presence in UAE, QATAR and KSA, where our assets and experience focus around Air Diving, Sat Diving, Excavation and Cable Installation scopes.

With our fleet of nearshore and deep-water vessels and equipment, combined with world leading project management experience, we have successfully completed the most challenging scopes for a wide range of tier 1 contractors and global energy clients.

HSEQ

James Fisher Subtech is committed to providing a safe working environment for all stakeholders and Health, Safety, Environment and Quality (HSEQ) matters are at the forefront of project delivery. We meet all relevant local legislation and ensure compliance with industry best practises; this is demonstrated through our membership of organisations such as the International Marine Contractors Association (IMCA). We are committed to the health, safety and welfare of our staff and those that work with and alongside us.
