Renewables

James Fisher Renewables

Track Record
2018-2022

Equipped to support every phase of the offshore wind farm lifecycle

At James Fisher Renewables we've done so, repeatedly and successfully, since 2007 in some of the toughest offshore operating conditions around the world.

A success story

We've achieved our status as a leading service provider in offshore wind for many reasons. Our capabilities, our assets, our exceptional people, and our international track record all play a part in our success story.

So too do our values – pioneering spirit, integrity, energy and resilience. Those only mean something when we apply them to our everyday work, and that is precisely what we do as we partner with customers internationally to support the transition towards low carbon sources of energy.

These values underpin our expertise for the extremes, readying us to take on the toughest challenges in the most hostile conditions. They add extra depth and substance to our experience, skills and insight as we work to deliver on our promises and help you realise the full potential of your asset.

Wayne Mulhall
Managing Director

Why James Fisher Renewables?

Capabilities

We have proven skills and insights that underpin everything we do.

Assets

We continue to invest in a resource base that enables us to offer technical solutions swiftly and efficiently.

People

Our people are specialist, trusted to innovate and engineer solutions thanks to their expertise, niche technical skills and front-line experience.

Global reach

Our network of global bases and strategic alliances positions us to deliver seamless services wherever they are required.

UK & Ireland Track Record 2021-22

Year	Client	Site	Site type	Service provided	Country	MW
2022	RWE	Sofia	Offshore wind	SOFIA OWF – ID and UXO Disposal (Offshore)	UK	N/A
