

Spooling

Controlled Umbilical and Rope Services

Controlled Spooling Services

Fisher Offshore's controlled umbilical and rope spooling services deliver accurate and efficient spooling results, up to a maximum 12T back tension, reducing the likelihood of problems offshore associated with incorrectly spooled umbilicals

Environmentally Robust System

Spooling is carried out with drip trays, wastewater recovery and spill response kits to prevent contamination of the environment

Superior Level of Cleaning and Inspection

A unique purpose built rotating head delivers new levels of cleaning power prior to pressure lube and inspection

Portable Spooling Package

Fisher Offshore's spooling equipment spread can be set up at your preferred location worldwide

Full Certification

Certification will be provided by Fisher Offshore on completion of spooling services

Established Spooling Supplier

Fisher Offshore has supplied spooling services to global contractors including Fugro, Nexans, Oceaneering, Sonsub, Stolt Offshore, Submersible Television Surveys and Subsea 7
