

PG04 Peanut Grinder

The PG04 Peanut Grinder is a dedicated Sub Sea Tool ideal for underwater maintenance & inspection work.

It is primarily designed for weld seam grinding and hole de-burring in steel structures although it is also suitable for a host of other applications.

The PG04 Peanut Grinder has a 6mm collet chuck with a flow range from 15 to 40lpm @140 bar. This tool features a safety trigger system which prevents accidental operation of the tool.
