

Productive field development at Okwari FPSO

Provision of multipurpose Subtech Paladin vessel, along with cable laying and diving teams. Subtech Paladin disconnected old flowlines and umbilicals and installed new ones for various wells at the Okwari FPSO. The scope of work included:

- Installation of Christmas trees and appurtenances at six wellheads
- Two-inch jumper installation at ND-06 wellhead
- Replace flowline at OK-34 wellhead
- Umbilical rerouting at OK-34 wellhead

Customer	Addax Petroleum Nigeria
